REPORTS: INTERNET EVOLUTION

The Future of the Internet: In a survey, technology experts and scholars evaluate where the network is headed in the next ten years

1/9/2005 |  Report | [Susannah Fox](#), Janna Quitney Anderson, [Lee Rainie](#)

A wide-ranging survey of technology leaders, scholars, industry officials, and analysts finds that most internet experts expect attacks on the network infrastructure in the coming decade as the internet becomes more embedded in everyday and commercial life. They believe the dawning of the blog era will bring radical change to the news and publishing industry and they think the internet will have the least impact on religious institutions.
